

IXL Summer Work Log - Name: _____

Expectation: Practice at least 30 min per week for a total of 5 hours over the summer

Spread your practice out over the entire summer.

Date	Time start	Time finished	Total minutes	Sections Practiced
Total: Add up all of your minutes				Total number of minutes
Convert minutes to hours				Total number of hours

FOR PARENTS

Maintain momentum during school breaks with IXL

User name: _____

Password: _____

Tip
1

Take advantage of IXL Recommendations

The IXL Recommendations page provides your child with personalized math suggestions to target trouble spots, master skills currently in progress, and tackle new challenges.

- After signing in to IXL, click on the Math tab and select Recommendations.
- Have your child practice:
 - Two "Work it out" skills (SmartScore goal: 80)
 - Two "Keep at it" skills (SmartScore goal: 90)
 - One "Try something new" skill (SmartScore goal: 80)

Recommendations

Here are all the next skills to practice. You will receive an email when you have completed them. Explore the different types of recommendations and their difficulty levels.

The screenshot shows the IXL Recommendations interface. It features a grid of skill cards. Each card displays a math problem, such as $3 + 7 = 23$, and a progress indicator. The skills are categorized into 'Work it out', 'Keep at it', and 'Try something new'. The interface also includes a search bar and navigation options.

Tip
2

Get guidance from IXL Analytics

- Click on the Analytics tab and choose the Trouble Spots report.
- Have your child revisit skills where he or she experienced difficulty.
- If your child answers a question incorrectly, have him or her review the explanation closely for guidance on important skill steps and strategies.
- Set a specific SmartScore goal for each Trouble Spots skill, and celebrate your child's persistence and progress along the way.

TROUBLE SPOTS

Ways to help Diego right now...

The screenshot shows the IXL Trouble Spots report. It displays a list of skills that the user has struggled with. One skill is highlighted, showing a question: "Look at this shape:" followed by a hexagon. Below it, another question asks: "Select all the shapes that are congruent to this one." followed by four shapes: a hexagon, a diamond, a pentagon, and a circle. The report also shows the user's current SmartScore and the number of missed questions.

Tip
3

Employ the "teach me" strategy

- After your child practices a skill identified through IXL's Recommendations page or Analytics, ask him or her to teach YOU how to tackle that skill. This learning exercise will strengthen your child's understanding of recently learned concepts.
- As your child teaches you a concept, try answering some questions for yourself! You can practice up to 10 questions per day on www.ixl.com without a subscription.
